Course Project Presentation

The Business Challenge

Customer Friction

Shoppers struggle to pick the right grind, roast, or brewing method across large online catalogs.

Support Overhead

Customer service teams spend 60%+ of their time answering repetitive inquiries — order tracking, delivery timelines, brew instructions.

Cart Abandonment

First-time buyers leave without converting due to unaddressed questions or friction in finding active promo codes.

60%+

of support time spent on
repetitive, answerable questions

Net Effect

Slower service, higher costs, and lost first-time buyers at the exact moment brand trust is being built.

The Solution: Intelligent Conversational Assistant

1

24/7 Virtual Barista

Recommends curated blends, beans, and cold brews based on individual preferences.

2

Instant Support Hub

Resolves shipping queries and delivery updates in seconds — no human agent required.

3

Brand-Aligned UI

Custom dark-themed interface styled in Sleepy Owl's signature burgundy (#5B2127) and roast tones (#2C2422).

Dual Value Proposition

FOR THE CUSTOMER

Effortless, Confident Shopping

- Instant order tracking & status
- Visual bestseller product cards
- Home-brewing ratio guides
- Instant discount access (newtotheowl)

MEASURABLE IMPACT

Zero wait time to confident purchase

FOR THE COMPANY

Scalable, Guided Selling

- 24/7 autonomous support coverage
- Guided selling to product checkout
- Upselling bundles & subscriptions
- Consistent brand storytelling

MEASURABLE IMPACT

60–70% ticket deflection, higher AOV

Core User Flows & Features

Bestseller Showcase

Displays visual product cards with prices (₹649) and direct purchase links to the Sleepy Owl Store.

Self-Service Order Tracking

Routes order dispatch and delivery inquiries without manual agent lookup.

Brewing Guides

Step-by-step instructions and water-to-coffee ratios for French Press, Cold Brew, and Hot Brew bags.

Offers & Subscriptions

Surfaces verified discount codes and automated delivery/subscription options.

Branding the Assistant on IBM watsonx

- Assistant renamed to “SleepyOwlBot” with a custom owl avatar matching the brand mascot.
- Dark theme selected for a premium, coffee-shop-at-midnight feel.
- Primary & accent colors set to brand burgundy #5B2127; secondary bubble in roast #2C2422.
- Preview panel confirms live rendering before publishing to the storefront.

NLU Intent Modeling

The screenshot shows the IBM watsonx Assistant interface. The left sidebar contains navigation options: Dialog, Intents (selected), Entities, Dialog, Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main area displays a table of trained intents.

	Description	Modified	Examples
☐ Intents (6) ↑			
☐ #brewing_guide	Questions about how to prepare, brew, or use Steepy Owl products.	2 hours ago	9
☐ #customer_greeting	Handles initial customer greetings, introductions, and general openi...	2 hours ago	3
☐ #main_menu		2 hours ago	6
☐ #offers_and_discounts	Requests for promo codes, subscription plans, bundles, and discou...	2 hours ago	9
☐ #product_inquiries		2 hours ago	6
☐ #track_order	Inquiries regarding shipping status, order dispatch, and delivery tra...	3 hours ago	8

watsonx Assistant — Intents dashboard (6 trained intents)

Each intent is trained on real customer phrasing so the assistant recognizes greetings, product questions, order-tracking requests, brewing help, and offer inquiries with high confidence — even when written casually.

Trained Across

6 Domain Intents

#customer_greeting

#product_inquiries

#track_order

#offers_and_discounts

#main_menu

Dialog Engineering & Website Deployment

Loop-free dialog tree with hybrid NLU + condition triggers

Embed script mounting SleepyOwlBot on the live storefront

LIVE ON THE STOREFRONT

See It In Action

Self-Service Order Tracking

Brewing Guides

Offers & Subscriptions

Each flow is reachable in one tap from the main menu, or by simply typing a natural-language question.

Business Outcomes & Future Scope

DIRECT IMPACT

Scalable Support, Zero Added Headcount

The assistant absorbs high-traffic promotional periods — flash sales, festive launches, bulk-order spikes — without expanding the support team.

60–70%

routine tickets
deflected

Higher AOV

via guided upsell
& bundles

1

Omnichannel Rollout

Extend to WhatsApp Business API and Instagram Direct for reach beyond the website.

2

Live Order Integration

Connect Shopify and Shiprocket APIs for real-time tracking numbers instead of static guidance.

3

Personalized Reordering

Use purchase history to proactively prompt timely reorders and replenishment.

Thank You
